SUMMARY

As a motivated Software Developer with over 2 years of experience in the software industry, I possess strong problem-solving and leadership skills. With 2+ years as a Developer, I excel in Agile, REST API, and client-side & server-side development. I offer valuable skills in mobile-friendly app development and experience in both higher education and continuous integration environments.

EXPERIENCE

Accedo – Software Developer   September 2022 – April 2023
- Crafted responsive web apps with 32,000+ monthly active users, leveraging mobile traffic growth aligned with strategic collaboration across marketing and sales teams.
- Resolved critical bugs, enhancing user experience, and optimizing web applications.
- Developed and managed 20+ responsive web apps, driving increased user engagement.
- Engineered UWP app for Xbox One using C++, HTML/JavaScript, .NET, Visual Studio 2017, and latest Windows 10 SDK.

Accedo – Web Developer   April 2021 – September 2022
- Led E-Commerce platform development, driving online sales and customer retention.
- Developed responsive web apps, aligning with marketing strategies to boost mobile traffic.
- Collaborated with cross-functional teams of designers and developers to identify and solve complex technical problems, including project architecture, backlog refinement, and future planning.

EDUCATION

University of Toronto
- Honours Bachelor of Science (HBSc)
- Computer Science, Mathematics, Communication Culture Information & Technology
